CONTENTS OF VOL. 77 Nos 1–6

NUMBER 1—JANUARY

Editorial
By E. A. Davis 1

A new method for molecular dynamics simulation of nanometric cutting
By N. Chandrasekaran, A. N. Khajavi, L. M. Raff and R. Komanduri 7

Search for quantum confinement effects in ultrathin layers of hydrogenated amorphous silicon
By S. A. Koehler 27

Cobalt valence and crystal structure of $La_{0.5}Sr_{0.5}CoO_{2.25}$
By Z. L. Wang and J. S. Yin 49

Full-potential calculations using the generalized-gradient corrections: structural properties of Ti, Zr and Hf under compression
By G. Jomard, L. Magaud and A. Pasturel 67

Transport in crystalline silicon–porous silicon junctions
By K. L. Narasimhan 75

Relativistic and non-relativistic electron transport in disordered alloys. I. Theory
By J. Banhart 85

Relativistic and non-relativistic electron transport in disordered alloys. II. Applications to palladium alloyed with copper, silver and gold
By J. Banhart 105

Phase stability of C15 MV_2 (M = Zr, Hf or Ta): an electronic structure investigation
By F. Chu, D. J. Thoma, T. E. Mitchell, C. L. Lin and M. Šob 121

Oxygen enhancement of 1·54 μm Er^{3+} luminescence in hydrogenated amorphous silicon
By M. Kechouane, N. Beldi, T. Mohammed-Brahim, H. L'Haridon, M. Salvi, M. Gauneau and P. N. Favennec 137

Thermal expansion anomalies and spontaneous magnetostriction in $RFe_{11}Ti$ single crystals
By A. V. Andreev and S. M. Zadvorkin 147

Characteristics of $BaTiO_3$ thin films on Si deposited by rf magnetron sputtering
By Q. X. Jia, J. L. Smith, L. H. Chang and W. A. Anderson 163

Mild hydrothermal synthesis of titanate films: from polycrystalline $BaTiO_3$ to epitaxial $PbTiO_3$
By W-Ping Xu, L. Zheng, C. Lin and M. Okuyama 177

Evidence of interaction between oxygen ions from conductivity relaxation and quasielastic light scattering data of yttria-stabilized zirconia
By K. L. Ngai 187

Application of electron cyclotron resonance chemical vapour deposition in the preparation of hydrogenated boron-doped SiC films
By S. F. Yoon, R. Ji and J. Ahn 197

Erratum 207

NUMBER 2—FEBRUARY

Special Issue: 6th International Workshop on Disordered Systems held in Andalo, Italy, 3–6 March 1997. Guest Editors: A. Fontana and G. Viliani

Preface
By G. A. Fontana and G. Viliani 209

To the memory of Dr Grigori S. Zavt
By M. Wagner 211

Spin glasses, glasses and granular materials
By A. Coniglio 213

Relations between the Parisi physical order parameter and ac magnetic susceptibility in spin glasses
By Y. G. Joh and R. Orbach 221

Spin-glass dynamics and the barrier model: extraction of the Parisi physical order parameter
By Y. G. Joh, R. Orbach and J. Hammann 231

Effctive potentials in glassy systems
By S. Franz and G. Parisi 239

Observed anomalies in supercooled liquids, described by frustration-limited domain theory
By D. Kivelson and G. Tarjus 245

Non-equilibrium fluctuation–dissipation relations in binary glasses
By G. Parisi 257

Domain growth on percolation structures
By U. Marini Bettolo Marconi and A. Petri 265

Self-organized criticality in disordered systems
By B. Tadić 277

Intermediate-range order and the liquid ↔ glass transformation
By D. Quitmann and M. Soltwisch 287

Molecular dynamics simulation of the dynamics of supercooled silica
By J. Horbach, W. Kob and K. Binder 297

Glass transition for dipolar hard spheres: a mode-coupling approach
By T. Scheidsteger and R. Schilling 305

Structural and vibrational properties of a soft-sphere glass: influence of the quenching rate
By P. Jund, D. Caprion and R. Jullien 313

Structure and dynamics of fractal aggregates with tunable fractal dimension
By R. Thouy and R. Jullien 321

Thermal and vibrational properties of silica xerogels
By A. Fontana, F. Rossi, G. Carini, G. D'Angelo, G. Tripodo and A. Bartolotta 333

Relaxation in dipolar and quadrupolar glasses
By R. Pirc and B. Tadić 341

Fast dynamics in glasses: relation between the boson peak and quasielastic scattering
By A. P. Sokolov 349

Structure and dynamics of phosphate glasses
By A. Matic and L. Börjesson 357

Preparation of SiO_2–GeO_2:Eu^{3+} planar waveguides and characterization by waveguide Raman and luminescence spectroscopies
By C. Duverger, S. Turrell, M. Bouazaoui, F. Tonelli, M. Montagna and M. Ferrari 363

Low-frequency Raman investigation of tunnelling states in glasses
By F. Terki, J.-L. Prat and J. Pelous 373

Vibration anharmonicity and picosecond relaxation in glasses
By V. N. Novikov 381

A multibody potential to study the structure of undoped and Er^{3+}-doped lead silicate glasses
By T. Peres, D. A. Litton, J. A. Capobianco and S. H. Garofalini 389

Density of vibrational states in highly disordered systems through Raman scattering and atomic-scale simulation
By R. Carles, A. Zwick, C. Moura and M. Djafari-Rouhani 397

The dispersion of vibrational excitations in vitreous silica
By S. N. Taraskin and S. R. Elliott 403

Dynamics and Raman scattering in diffusion-limited cluster–cluster aggregation models
By A. Rahmani, C. Benoit, R. Jullien and G. Poussigue 421

The fast β process in *m*-tricresyl phosphate and its possible connection with the boson peak: a light scattering analysis
By M. Soltwisch, G. Monaco, G. Ruocco and D. Quitmann 435

Analysis of the low-temperature specific heat in polyethylene
By G. Carini, G. D'Angelo, G. Tripodo, A. Bartolotta and G. Di Marco 443

Specific heats of rare-earth ions in crystalline and glassy phosphate matrices
By G. Carini, G. D'Angelo, G. Tripodo, A. Bartolotta, A. Fontana, F. Rossi and G. A. Saunders 449

Quasielastic scattering and fast localized relaxation in poly(methyl methacrylate) glass
By E. Duval, A. Mermet, N. Surovtsev, J. F. Jal and A. J. Dianoux 457

Brillouin light scattering of a fragile glass former: *o*-terphenyl
By G. Monaco, L. Comez and D. Fioretto 463

Numerical study of the low-frequency atomic dynamics in a Lennard-Jones glass
By M. Sampoli, P. Benassi, R. Dell'Anna, V. Mazzacurati and G. Ruocco 473

Subsonic solitons in the Fermi–Pasta–Ulam chain
By R. Dusi and M. Wagner 485

Acoustic emission and microcrack correlation
By A. Petri 491

Mode coupling for non-spherical molecules: a semischematic model applied to simulated water
By L. Fabbian, F. Sciortino and P. Tartaglia 499

Modes in amorphous silicon
By J. L. Feldman, S. R. Bickham, G. E. Engel and B. N. Davidson 507

Molecular dynamics simulations of vibrational lifetimes in amorphous silicon
By S. R. Bickham and J. L. Feldman 513

Do high-frequency acoustic vibrations propagate in structurally disordered solids?
By R. Vacher, M. Foret, E. Courtens, J. Pelous and J.-B. Suck 523

Study of the longitudinal dynamics of glass-forming systems in the mesoscopic energy–momentum region
By C. Masciovecchio, G. Monaco, G. Ruocco, F. Sette and M. Soltwisch 533

Electron spin resonance studies of the enhanced rotation and the fractional Debye–Stokes–Einstein law in polymeric liquid crystals
By L. Andreozzi, A. Di Schino, M. Giordano and D. Leporini 547

Comparison of inelastic light and neutron scattering in $Se_{1-x}Ge_x$ glasses: structure and light-vibration coupling coefficient frequency dependence
By A. Boukenter and E. Duval 557

Numerical studies of polymer networks and gels
By K. Kremer 569

Neutron scattering analysis of low-frequency modes in silica
By A. Wischnewski, U. Buchenau, A. J. Dianoux, W. A. Kamitakahara and J. L. Zarestky 579

Simulation of the glass transition in polymeric systems: evidence for an underlying phase transition?
By K. Binder, J. Baschnagel, S. Böhmer, and W. Paul 591

Hopping in a rearranging structure
By P. Maass and P. Pendzig 609

A coupling model analysis of dynamics of concentrated colloidal suspensions
By K. L. Ngai and R. W. Rendell 621

Phonons and relaxations in oxide and polymeric glasses
By J. Pelous, J. L. Prat, Y. Scheyer, C. Levelut and F. Terki 633

Collective and single-particle dynamics near the isotropic–nematic phase transition
By R. Torre, F. Tempestini, P. Bartolini and R. Righini 645

Fragile-like behaviour and H-bond interactions of the glass-forming water–trehalose system
By S. Magazù, G. Maisano, P. Migliardo, A. M. Musolino and V. Villari 655

Fictive temperature and medium range order in silicate glasses: a relationship between heat capacity and boson peak
By B. Champagnon, C. Chemarin and P. Richet 663

Spreading of damage in the Sherrington–Kirkpatrick spherical spin glass
By D. A. Stariolo 671

Molecular dynamics study of Eu^{3+} in an aqueous solution: luminescence spectrum from simulated eivornments
By S. Chaussedent, A. Monteil, M. Ferrari and L. Del Longo 681

Search for tunnelling centres in Lennard–Jones clusters
By G. Daldoss, O. Pilla and G. Viliani 689

Low-frequency vibrations in monomers, dimers and polymers of propylene glycol
By P. Ahlström, G. Wahnström, P. Carlsson, S. Schantz, A. Brodin, F. Maurer and L. Torell 699

Raman scattering from systems of linear chain molecules (poly(propylene oxide)) of different lengths: a comparison with molecular dynamics simulations
By A. Brodin, L. M. Torell, P. Ahlström and G. Wahnström 709

NUMBER 3—MARCH

Quarternary borocarbide superconductors
By L. C. Gupta 717

Peierls instabilities in covalent structures. I. Electronic structure, cohesion and the $Z = 8 - N$ rule
By J.-P. Gaspard, A. Pellegatti, F. Marinelli and C. Bichara 727

De la magnétorésistance à la structure de bande du polyparaphénylène dopé par implantation ionique
By A. Moliton, A. Bellati, B. Lucas and B. Francois 745

Metastable hydrogen atom trapping in hydrogenated amorphous silicon films: a microscopic model for metastable defect creation
By C. Godet 765

Point defects in uranium dioxide
By T. Petit, C. Lemaignan, F. Jollet, B. Bigot and A. Pasturel 779

Green's function for electron scattering and its applications in low-voltage point-projection microscopy and optical potential
By Z. L. Wang 787

Electronic states in hydrogenated microcrystalline silicon
By F. Finger, J. Müller, C. Malten and H. Wagner 805

Steady transfer of a monolayer between two Langmuir troughs via the Marangoni effect
By S. He and J. B. Ketterson 831

Hierarchical nature of the Brillouin zones in icosahedral $Al_{59}B_3Cu_{25.5}Fe_{12.5}$
By B. Vigneron, A. Perrot, F. Machizaud, J. M. Dubois, G. Jeandel and B. Wyncke 849

Origin of near-infrared optical damage on proustite surfaces
By K. V. Shcherbin, S. G. Odoulov, B. Sugg, D. Hartmann, M. Neumann and R. A. Rupp 859

Chemical embrittlement of Fe grain boundaries: P and the P–Mo couple
By L. P. SAGERT, G. B. OLSON and D. E. ELLIS 871

Short-range order in β-NiAl microalloyed with iron
By D. C. MEYER, K. RICHTER, B. WEHNER and P. PAUFLER 891

Phase stability limits via non-equilibrium normal mode analysis
By B. J. REARDON and J. KIEFFER 907

NUMBER 4—APRIL

Optical, structural and electrical properties of device-quality hydrogenated amorphous silicon–nitrogen films deposited by plasma-enhanced chemical vapour deposition
By F. GIORGIS, F. GIULIANI, C. F. PIRRI, E. TRESSO, C. SUMMONTE, R. RIZZOLI, R. GALLONI, A. DESALVO and P. RAVA 925

Determination of surface states in hydrogenated amorphous silicon by subgap absorption measurements
By A. K. SINHA and S. C. AGARWAL 945

Anatomy of the drift–diffusion relationship
By E. BRINGUIER 959

Local heating in ballistic atomic-scale contacts
By T. N. TODOROV 965

Magnetoresistance and de Haas–van Alphen oscillation in normal and superconducting $CeRu_2$
By M. HEDO, Y. INADA, K. SAKURAI, E. YAMAMOTO, Y. HAGA, Y. ONUKI, S. TAKAHASHI, M. HIGUCHI, T MAEHIRA and A. HASEGAWA 975

First-order pre-melting transition of vortex lattices
By H. M. CARRUZZO and C. C. YU 1001

A molecular dynamics study of film deposition on vicinal surfaces: Ag/Si
By A. M. MAZZONE 1011

Effect of hot pressing on the modulated structure of $Zr_{0.98}Sn_{0.02}TiO_4$
By Y. PARK, S. A. SONG and H. G. KIM 1033

Size and charge effects on the structural stability of $LiMO_2$ (M = transition metal) compounds
By E. J. WU, P. D. TEPESCH and G. CEDER 1039

Defect states in the intrinsic layer of amorphous silicon solar cells studied by the constant-photocurrent method
By P. SLÁDEK, P. ST'AHEL, P. ROCA I CABARROCAS and P. MORIN 1049

A first-principles Hartree–Fock description of MnO at high pressures
By W. C. Mackrodt, E.-A. Williamson, D. Williams and N. L. Allan 1063

First-principles Hartree–Fock description of the electronic structure of monoclinic $C2/m$ Li_xMnO_2 $(1 \geqslant x \geqslant 0)$
By W. C. Mackrodt and E.-A. Williamson 1077

NUMBER 5—MAY

Special Issue: Minerva Workshop on Mesoscopics, Fractals and Neural Networks, Eilat, Israel, 25–27 March 1997. Guest Editors: R. Berkovits, S. Havlin, I. Kanter and M. Kaveh

Introduction
By M. Kaveh, R. Berkovits, S. Havelin and I. Kanter 1093

Chiral boundary conditions for quantum Hall systems
By E. Akkermans and R. Narevich 1097

The quantized Hall insulator
By E. Shimshoni and A. Auerbach 1107

Interaction footprints in two-dimensional disordered electronic systems
By Y. Avishai and R. Berkovits 1115

Phase correlations in transmission through a cavity
By R. Berkovits, Y. Gefen and O. Entin-Wohlman 1123

Quantum chaos with a direction
By E. K. Efetov 1135

A single impurity in Tomonaga–Luttinger liquids
By Y. Oreg and A. M. Finkel'stein 1145

Random-matrix models with the logarithmic-singular level confinement: method of fictitious fermions
By E. Kanzieper and V. Freilikher 1161

Level-spacing universality in a random-matrix model with an external source
By S. Hikami 1173

Diffusion and multifractality at the metal–insulator transition
By B. Huckestein and R. Klesse 1181

Conductance in a one-dimensional spin polarized gas
By D. Schmeltzer, E. Kogan, R. Berkovits and M. Kaveh 1189

Attenuation of surface acoustic waves by quantum dots
By A. Knäbchen, Y. B. Levinson and O. Entin-Wohlman 1195

Thermodynamics and transport in mesoscopic disordered networks
By M. Pascaud and G. Montambaux 1203

Nonlinear transport in a single-mode one-dimensional electron gas
By K. J. Thomas, J. T. Nicholls, M. Y. Simmons, M. Pepper, D. R. Mace and D. A. Ritchie 1213

Resonant tunnelling through small metallic islands and quantum dots
By J. König, H. Schoeller and G. Schön 1219

Perturbation theory for the Rosenzweig–Porter matrix model
By A. Atland, M. Janssen and B. Shapiro 1231

Charging spectrum of a small Wigner crystal island
By A. A. Koulakov and B. I. Shklovskii 1235

Flow equations of Hamiltonians
By F. Wegner 1249

The phase of the transmission amplitude through a quantum dot
By G. Hackenbroich, W. D. Heiss and H. A. Weidenmüller 1255

Magnetoresistance in mesoscopic systems: superparamagnetic particles
By N. Wiser 1263

Aggregation models for town growth
By L. Benguigui 1269

Trapping of Brownian particles by random traps: destruction of the fluctuation slow-down
By A. M. Berezhkovskii, V. Zaloj and Y. A. Makhnovskii 1277

Stochastic modelling of ion dynamics in complex systems: dipolar effects
By B. Rinn, W. Dieterich and P. Maass 1283

A field-theoretical formulation for granular stress
By S. F. Edwards 1293

Tunnelling percolation: universality and application to the integer quantum Hall effect
By A. Hansen and J. Kertész 1301

Transparent diffusion-limited aggregation in one dimension
By D. A. Kessler 1313

Stretched-exponential relaxation: the role of system size
By A. Bunde, S. Havlin, J. Klafter, G. Gräff and A. Shehter 1323

Long-range power-law correlations in local daily temperature fluctuations
By E. Koscielny-Bunde, H. E. Roman, A. Bunde, S. Havlin and H.-J. Schellnhuber 1331

Experimental studies of stratification in a granular Hele–Shaw cell
By H. A. Makse, S. Havlin, P. R. King and H. E. Stanley 1341

Limit theorems and price changes in financial markets
By R. N. Mantegna and H. E. Stanley 1353

Structure of self-avoiding walks on percolation clusters at criticality
By H. E. Roman, A. Ordermann, M. Porto, A. Bunde and S. Havlin 1357

Scale-invariant correlations in the biological and social sciences
By H. E. Stanley, L. A. N. Amaral, J. S. Andrade, Jr, S. V. Buldyrev, S. Havlin, H. A. Makse, C.-K. Peng, B. Suki and G. Viswanathan 1373

Anomalous kinetics of reaction–diffusion fronts
By H. Taitelbaum and Z. Koza 1389

Dynamical phase transitions in a random environment
By I. Webman, D. ben-Avraham, A. Cohen and S. Havlin 1401

Dissipation in granular materials
By D. E. Wolf, F. Radjai and S. Dippel 1413

Mercury spreading on silver films: interface characteristics
By L. Kaplan, A. Shehter, Y. Lereah, H. Taitelbaum and S. Havlin 1427

Asymptotic properties of the A + B → 0 reaction–diffusion front
By Z. Koza 1437

Hard-sphere radii for the generalized Lindemann criterion
By S. Rabinovich, E. Brook-Levinson, E. Zilberman and A. Voronel 1441

Anderson localization in a correlated landscape near the band edge
By S. Russ, S. Havlin and I. Webman 1449

Phase transition of neural networks
By W. Kinzel 1455

Self-similarity in networks that learn by examples
By C. Van den Broeck and G. J. Bex 1479

Specialization processes in on-line unsupervised learning
By M. Biehl, A. Freking, G. Reents and E. Schlösser 1487

Bounds on learning in polynomial time
By H. Horner and A. Bethge 1495

Storage properties of correlated perceptrons
By A. Engel, D. Malzahn and I. Kanter 1507

Some remarks on hierarchical replica symmetry breaking in finite-connectivity systems
By R. MONASSON 1515

Globally optimal learning rates for multilayer neural networks
By D. SAAD and M. RATTRAY 1523

Online versus offline learning
By M. OPPER 1531

The Minesweepers' Bayesian guide to survival
By P. RUJÁN 1539

Spiking mechanisms of cortical neurons
By S. SHINOMOTO and Y. SAKAI 1549

Learning and generalization in higher-order perceptrons
By H. YOON and J.-H. OH 1557

Time ordering in the evolution of information processing and modulation systems
By N. CATICHA and O. KINOUCHI 1565

Solitary waves on manifolds of integrate-and-fire neurons
By D. HORN and I. OPHER 1575

Finite sample bounds for time series prediction
By R. MEIR 1585

Towards a mean-field model of a genome
By J. HERTZ 1593

NUMBER 6—JUNE

Growth of large-grain R–Mg–Zn quasicrystals from the ternary melt (R = Y, Er, Ho, Dy and Tb)
By I. R. FISHER, Z. ISLAM, A. F. PANCHULA, K. O. CHEON, M. J. KRAMER, P. C. CANFIELD and A. I. GOLDMAN 1601

The spin susceptibility pseudogap due to Gaussian pairing in three dimensions
By J. R. ENGELBRECHT 1617

Electron-energy-loss spectroscopy study of a stable decagonal quasicrystal $Al_{70}Ni_{20}Rh_{10}$
By M. TERAUCHI, H. UEDA, M. TANAKA, A.-P. TSAI, A. INOUE and T. MASUMOTO 1625

Elastic and nonlinear acoustic properties and thermal expansion of rare-earth metaphosphate glasses
By M. ACET, T. BRENNAN M. CANKURTARAN, G. A. SAUNDERS and H. ZÄHRES 1633

Magnetic behaviour of the molecular sponge $CoCu(pba)(H_2O)_3 \cdot 2H_2O$, where pba = 1,3-propylene bis(oxamato)
By S. A. Chavan, J. Larionova, O. Kahn and J. V. Yakhmi 1657

Anomalous ac susceptibility behaviour in ion-irradiated $YBa_2Cu_3O_{7-\delta}$ epitaxial thin films
By S. Chaudhary, S. C. Kashyap, D. K. Pandya and D. Kanjilal 1669

Crystallization and magnetic behaviour of Fe–Nb–Cu–Si–B alloys
By A. Mitra, S. Palit and I. Chattoraj 1681

Subject index 1693

Index of authors (with titles of papers) 1699
